Hi Jim,

Attached is the analysis and graphs that were part of the background materials R10 circulated for our June 3 call with Ecology.

As a side note, I asked Bella from R10 to add me to the distribution list/invitation for the 28 August meeting since I'm coordinating on HQ's end. It appears the timing is uncertain right now, but sometime the (Eastern time zone) afternoon of Aug. 28. Can you verify that you are available and planning to travel? This info will be helpful as I work with folks to determine who, if anyone, can call into the meeting from HQ.

Thanks,

Sarah

Hi Sarah,

Can you send me Helen's analysis of the effect of lag on the WQ projections? I seems to have misplaced the file and can't find the associated email. Thanks!

Jim
